Summary

Computer Engineering student currently learning Full-Stack Web Development with a focus on Front-End development. Interested in Artificial Intelligence, Machine Learning, and modern web technologies. Developing problem-solving skills and clean coding practices through academic and personal projects.

Education

Palestine Technical University - Kadoorie B.S. in Computer Engineering 2022 - 2027
Final-year Computer Engineering student

Certifications & Training

Udacity - Intro to Programming Certificate Jun 2024 - Sep 2024
Knowledge Academy - C++ Programming & Data Structures Certificate Oct 2024 - May 2025
Prime Academy - Java Programming & OOP Certificate Oct 2022 - Jan 2023
Computer Vision Online Course Apr 2026 - Aug 2026
Knowledge Academy - Front-End Web Development Training 2026 - Present

Featured Projects

NeuroScan-AI - *Machine Learning Developer (Co-Developer)* GitHub
- Built an AI-powered brain MRI classification application using deep learning models and a web interface.
- Added image validation to ensure only valid brain MRI images are accepted and processed.

Shopping Cart Web Application - *Front-End Developer* GitHub
- Created an interactive shopping cart using HTML, CSS, and JavaScript as part of the Intro to Programming internship.

T-Shirt Store Design Patterns - *Java Developer* GitHub
- Developed a Java application applying Factory, Decorator, Observer, and Singleton design patterns.

University Person Management System - *Java Developer* GitHub
- Modeled students, teachers, and staff using inheritance and abstraction to manage different person types.

Other Projects

- **Java Geometric Shapes OOP** — area/perimeter calculations using inheritance & polymorphism GitHub
- **Java Employee Payroll System** — employee & payroll management using OOP GitHub
- **Cafe Menu & Order Management System** — menu and order management using OOP GitHub
- **Animal Card** — responsive front-end card display GitHub

Technical Skills

Programming Languages: Java, C++, Python, Assembly, JavaScript
Web Technologies: HTML, CSS, Bootstrap, Tailwind CSS, React
Database: MySQL, Oracle Database
Tools & IDEs: Visual Studio Code, Visual Studio, Apache NetBeans, Google Colab, Git & GitHub, EMU
Soft Skills: Communication Skills, Teamwork, Adaptability, Self-Learning, Time Management, Problem Solving
